SAVE TIME WITH PRE-MOUNTED ELECTRICAL COMPONENTS

With DIRTT's conventional electrical offerings, you get all the components you need to streamline your full electrical buildout. Reduce installation time with pre-mounted conduits and electrical back boxes for any device type. Mounting wall boxes in our factory give you precision placement down to the millimeter. Our controlled environment provides more accuracy than an on-site install to reduce rework. Pre-wired outlets with pre-determined cable lengths are also available where modular connections aren't necessary. This reduces your electrical labor scope and further streamlines the install process.

OPTIONS

- | | |
|-----------|--|
| 01 | EMPTY BACK BOX
Device boxes of any type (depth dependent). |
| | Used for light switches, sconces, controls, and more |
| | Flush-mounted and in-wall options available. |
| 02 | BOX WITH CONDUIT
Back box with connected conduit to plenum or floor. |
| | ½", ¾", and DIRTT networks conduit (1¼" equivalent) available. |
| | Factory interconnected boxes with conduit in frame. |
| 03 | PRE-TERMINATED DEVICES
Pre-terminated devices with cable to plenum or floor. |
| | Used where modular connector is not viable. |
| | Patient-care-compliant alternatives are also available. |
