Graphics

DIRTT®

TELL THE STORY OF YOUR SPACE WITH CUSTOM GRAPHIC WALL PANELS

Whether you're creating design focal points, integrating company branding, or incorporating artwork directly on your walls, DIRTT graphics can bring your vision to life. Use large-scale imagery to support wayfinding, distraction graphics, or biophilic design. Bring a sense of community to your space by applying local photography directly to the surface of your walls. And with a wide range of finish options, DIRTT graphics will support your style, no matter how you want to express yourself.

YOU'VE GOT THE LOOK

You've got a vision and we'll help you achieve it. With DIRTT, integrating custom graphics is easy. Whether you're applying imagery directly to a wall panel, using decorative film to adorn glass, or showing off high-resolution imagery on display-grade glass, there are a variety of options to suit your aesthetic. And like the rest of the DIRTT Construction System, our integrated graphics are applied precisely to ensure nothing gets in the way of your design.

TELL YOUR STORY

You've spent time building your brand. You're proud of it. Create a space that supports your identity. Whether it's logo work on custom colors, robust iconography, or a historical timeline, your space can be a canvas to fuse aesthetics, storytelling, and marketing in one of the places it matters most. Create a sense of community for those who work in the space and inspire a sense of wonder to those who visit.

GUIDE THE WAY

Tell people where to go in a way that seamlessly integrates into your design. From room numbers and directional arrows to color-coded hallways and highly designed experience paths, wayfinding graphics keep people on track. Use your imagination and we'll bring it to life.

INCREASED FUNCTIONALITY

Make the absolute most of your building. A wall doesn't just have to separate one room from another. Use large scale nature imagery to reap the benefits of biophilic design. Engage visitors with thoughtful content throughout the space. Include distraction imagery to reduce stress levels in a healthcare environment. Or create stunning spaces with writable surfaces for increased collaboration. DIRTT graphics can unlock the full potential of your space.

Graphics

SYSTEM FEATURES	
01	Choose from our collection of predesigned graphics and patterns or customize with your own artwork on DIRTT solid or glass walls.
02	Custom graphics are pre-applied to panels during manufacturing and arrive fully finished on-site.
03	Choose from glossy, matte, or glass surfaces to support your design vision.
